Hello,

I can effectively develop state-of-the-art web applications, or drive your software development requirements elicitation, conversion to models, and technical documentation. I'm an experienced software development consultant, currently seeking a web development position at your excellent institution.

I am well-versed and passionate about current software technology. Software code can be a thing of beauty; an art, as well as an engineering discipline. I have a BA in chemistry --*cum laude,* and over 20 years of experience in the software development trade. I'm a US Citizen born in Warwick, Rhode Island. I reside in Manhattan, NYC.

Here are my top skills:

- HTML/HTMX	- CSS/Bootstrap/Sass	- Python
- Django	- PostgreSQL/mySQL	- Pycharm/VS/Android Studio
- JQuery/AJAX	- UML	- Git/ChatGPT/Gemini AI

I am certain that I can become one of your best analysts. Please allow me some of your time, at your best convenience, for an in-person interview.

Thank you,

Daniel M Tébar
